DETAILED ACTION

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 14-23 are rejected under 35 U.S.C. 102(e) as being anticipated by Peterson et al. Peterson et al., discloses the claimed invention including a method of coupling signals from respective transducer elements (claims 1-5), the method comprising a scanhead for transmitting and receiving signals (figure 1, reference 10) a

combiner for combining the receiving signal (figure 1, reference 36), and an ultrasonic processor (figure 1 reference 30 and 38).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Peterson et al., in view of Hwang et al. Peterson et al., discloses the claimed invention including a method of coupling signals from respective transducer elements (claims 1-5), the method comprising a scanhead for transmitting and receiving signals (figure 1, reference 10) a combiner for combining the receiving signal (figure 1, reference 36), and an ultrasonic processor (figure 1 reference 30 and 38). However, Peterson et al., does clearly teach a communication link. Hwang et al., teaches the use of a communication link coupled to the signal combiner insofar as there is integrated circuitry in the scanhead that links to a ultrasound processor (columns 3-4). Accordingly, it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the communication link of Hwang et al., with the ultrasound system of Peterson et al., in order to image a region of interest.

Allowable Subject Matter

Claims 5, 7-13 are 24-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

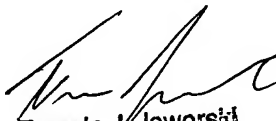

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Maulin Patel whose telephone number is 703-305-6933. The examiner can normally be reached on Mon - Fri, 8:00-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marvin Lateef can be reached on 703-308-3256. The fax phone numbers for the organization where this application or proceeding is assigned is 703-308-0758.
